The energy sector, especially the oil & gas industry has seen the toughest of the times during the unprecedented crisis due to the pandemic in the year 2020. The upstream sector in particular has been heavily impacted due to the crisis that requires the industry to take extraordinary steps to rethink and reengineer the processes across projects, monetizing discoveries, exploration & production.

Oil & Gas has been an integral part of Chemtech series of tradeshows and continued to engage the stalwarts & technocrats from the India's hydrocarbon sector with the technology providers from across the globe. After the very successful on-ground 9th edition of integrated energy show and launch of digital platform in 2021, Chemtech has taken the initiative to bring together the stakeholders in the digital space

Oil, Gas & Power.IE 2021 the online tradeshow & technical upstream conference, will create an opportunity for the stakeholders from across the globe to connect with the key decision makers of Indian hydrocarbon industry during three days of tradeshow.

Exhibitors can offer digital experience to the potential customers round the clock from different time zones and engage in knowledge sharing sessions with professionals engaged across exploration, development & production operations

INDUSTRY CONNECT

WITH

Oil Field Equipment, Technology & Services Providers

To meet the growing energy needs of country & combat climate change, the Indian Government has accelerated the pace to develop natural gas as the clean fossil fuel, diversify energy basket through introduction of renewables & very recently announced the plans to kick start developing hydrogen ecosystem. Government is pulling out all stops to create necessary Gas infrastructure viz. LNG terminals, Nationwide Gas Grid and City Gas Distribution networks to increase the availability and accessibility of natural gas to public at large.

Post success of series of LNG forums over the last two editions of Oil & Gas World Expo series of on ground tradeshow & conferences, Chemtech has taken the initiative to bring together the stakeholders from the LNG value chain from across the globe, Indian CNG sector, allied services & technology providers and most importantly buyers from the industries to interact in the digital space

Gas World Tech.IE 2021 will provide an opportunity to the LNG buyers & suppliers , Technology Equipment & Services providers to showcase latest products & innovations for applications across operations across Liquefaction, Transportation & Storage , Regasification , Gas Processing & Distribution Networks for safe delivery to the end users across multiple industries. Knowledge sharing sessions will enable to engage in productive discussions with the regulators, stakeholders & users of this clean fuel

From Expansion to Diversification of Product Portfolio with Increased Synergy

Even without large crude oil resources, India has today developed a mature refining and downstream petroleum industry. As per the forecast, India overtakes Russia in the early 2030 (6.4 Mb/d), to become the world's third-largest refining with capacity of 8 mb/d by 2040.

Petrochemical and refinery integration along with 'Crude to Chemicals' strategy is expected to be the next big game changer in oil business. Consumption in developing countries are growing rapidly with increasing disposable income. This requires further investment to sustain demand growth. For Indian players, focus is shifting from expansion to diversification of product portfolio with increased synergy.

Refining & Petrochemicals.IE 2021 will provide an opportunity to the technology , equipment & services providers to digitally share the latest innovations to refiners & petrochemicals manufacturers . Knowledge sharing sessions will provide an apt platform to engage in discussions to understand the future plans and expectations of this industry.

Energy is fundamental to the economic growth of a country & central to nearly every challenge that the world faces today. Increasing population & sustained economic growth will continue to drive the demand of power & per capita usage in India. Power consumption is expected to reach 1,894.7 TWh in 2022. The Government has allocated USD 42 billion for revamped, reforms based & result link new power distribution sector scheme over the next 5 years under the Union Budget 2021- 22. The sector also offers 100% FDI

SDG 7, the 7th Sustainable Development Goal of United Nations ensure access to affordable, reliable, sustainable & modern energy to all. To achieve the SDG7 & Power for All the Indian Government has taken the pragmatic approach towards capacity addition across power infrastructure and diversification of energy basket and increase the share of clean energy sources viz. Solar, Wind, Biomass & Hydropower.

5th edition of Power World Expo held on-ground in year 2020 received overwhelming response from the power generation , transmission & distribution industry. Even during the pandemic Power sector has continued to be key area of focus for Indian Government which is providing string impetus to the reforms & capacity expansion with the provision of 100% FDI .

Power World.IE 2021 provide an opportunity to the power producers, T&D services providers and Infrastructure companies to experience latest technologies digitally during the tradeshow. Conferences will create a platform for knowledge sharing & networking with the peer group

“

Dr. Nitin Kashinath Raut

Minister of New & Renewable Energy, Government of Maharashtra

“Ensuring access to affordable electricity by 2030 means investing in clean energy sources such as solar, wind and thermal. Today, India is fast emerging as a global clean energy powerhouse, where the renewables sector has taken rapid strides. In such situations, it is the forums like Power World Expo & Conference which play pivotal role in bringing together the key decision makers from the regulatory authorities from the government, power producers, infrastructure & technology providers to a common point to deliberate on the concerns.”

Dr. Anil Kakodkar

Former Chairman, Atomic Energy Commission;
Chairman – Rajiv Gandhi Science &
Technology Commission

“One of the biggest challenges we face is the money outgo because of the energy and energy related imports. In a country like India, we really can't afford such growing money outgo as it would become unsustainable in not so distant future. This is partly because the energy resources are at a stretch; and also because of the ever rising cost of energy resources, barring gas as an exception.”

Mr. A K Jha

Former CMD, NTPC Limited & Convener –
Power World Expo 2020

“In today's perspective, 55% of the peak energy is driven by renewable energy which confers to the fact that conventional power plant like Thermal and Gas have to back down by 45% of their capacity in order to have no curtailment in renewable energy power. This is one of the biggest challenges being faced by the country today. On the flip side, this will further increase the renewable energy capacity.”

”

Leaderspeak

Mr. B Narayan

Group President Procurement & Projects ,
Reliance Industries Ltd.

"Digital twin allows refiners to monitor the asset on a real time basis and enable them to process the difficult crudes to the maximum possible extent. The digital twin takes into account, metallurgy, process conditions, corrosion and severity of process impact and leads to generation of millions of points of structured & unstructured data that can be analyzed using analytics. This data can then be utilized for machine learning & using AI to run operations. And that is where future refineries are headed to."

Mr. Prasad Panicker

Director & Head of Refinery , Nayara Energy &
Chairman, CAB, Refining & Petrochemicals
World Expo 2020

"At the turn of the millennium, India had refining capacity of 110 MMTPA which has more than doubled in the last 20 years and stands at 250 MMTPA. While we feel very happy about the growth of the refining industry, we have to be mindfully conscious of the major disruptions such as EVs, fuel cells and biofuels. Crude oil volatility, trade wars and now the very recent one because of the virus is impacting the oil industry severely."

Mr. Rajeev Mathur

Executive Director (Corporate Affairs) & OSD to CMD,
GAIL Ltd; & Chairman, CAB, GASTech World Expo 2020

"The Government is very supportive towards increasing the share of natural gas from 6 to 15 percent in the country's energy basket. As a consequence of this forecast, the use of gas is also expected to increase by 5 folds in next 10 years. I am sure going forward, we will be able to find the ways and means to unlock the potential of natural gas and facilitate the stake-holders to pitch in."

Mr. R C Bhargava

Chairman, Maruti Suzuki India Ltd.

"It is important to focus very strongly on usage of Gas in transportation industry, because the import of crude has reached a figure of around 226 million tons imparting a cost factor of around USD 112 billion which is a huge drain on foreign exchange resource. The potential for the future growth for commuting vehicles is enormous as mobility is the prime factorial for the economic development and better quality of life."

Leaderspeak

“

Mr. S K Moitra

Director (Onshore), Oil and Natural Gas Corporation (ONGC) Ltd; Chairman, Central Advisory Board – Oil & Gas World Expo 2020

“All over the world, Governments are giving parallel thrust to increase the share of unconventional energy in their energy requirements. In this challenging time, the potential of the redevelopment of mature oil and gas fields, which was often overlooked is the game changer for industry.”

Mr. Subramanian Sarma

CEO & MD, L&T Hydrocarbon Engineering

“70% of today’s production is coming from matured fields as the easy-oils are gone. If we consider the first & basic thing that would be able to prolong the life of a reservoir without incurring any specific cost, it is the ability to predict the type & quality of reservoir, what does it take to manage as well maintain the reservoir and how to build the production profile.”

Ms. Ann Ollestad

Consul General, Consulate General of Norway in Mumbai

“Along with digital revolution, soft power is also very important. I have been working in India for nearly 8 years now and have seen that India has a very important innovative and necessary resources a women and young generation. I would really like to see more young people and women are recruited in this sector; and then for sure you will see the real change coming in and you will need it.”

Mr Pankaj Kumar Goswami

CGM (Projects), Oil India Ltd

“The integrated energy trade show held from March 4-6, 2020 in Mumbai was a splendid show by Chemtech Team. It was an unique occasion combining knowledge platform with a vast networking platform. There was extensive arrangement to host a huge gathering from diverse fields of work. In spite of this large magnitude, everything was very orderly. This was possible for the hard work of the organizing team. All the delegates of OIL family are immensely benefitted by this show.”

”

Testimonials

Dr C Laxma Reddy

Additional Director General (Exploration)
Directorate General of Hydrocarbons.
Ministry of Petroleum and Natural Gas, Govt of India

Congratulations to Chemtech team for creating an excellent forum to exchange the creative ideas providing deep insights that lead to well-informed, confident decisions related with oil and gas industry with very engaging sessions.

I visited several stalls in the vast Exhibition arena which showcased hundreds of exhibitors from across the globe who are involved in complete gamut of energy industry. I look forward to be a part of the next edition of the Conference and Exhibition.

Mr. A K Das

CGM(P) CEA to Dir(Onshore), ONGC

"I am delighted to be present in the Oil & Gas World Expo 2020. Congratulations to Chemtech team for designing & organizing the conference & exhibition so well. Brilliant format and very engaging sessions. The sessions were a good mix of technical presentations and panel discussions with good time allocated for audience interaction."

Mr. Pankaj Kumar Goswami

Group General Manager/Executive Director
Oil India Limited

The integrated energy trade show held from March 4-6, 2020 in Mumbai was a splendid show by Chemtech Team. It was an unique occasion combining knowledge platform with a vast networking platform. There was extensive arrangement to host a huge gathering from diverse fields of work. In spite of this large magnitude, everything was very orderly. This was possible for the hard work of the organizing team. All the delegates of OIL family are immensely benefitted by this show.

Mr A K JHA

Former CMD , NTPC Limited & Convener
Power World Expo 2020

POWER WORLD 2020 has been a grand success amidst the ever changing power scenario. With RE share in installed capacity rising to 35% and targeted to reach 40 % to meet the COP21 commitment of India, the challenges for the thermal power generators and the Grid management people are enormous. EXPO covered both these aspects, by bringing the Industry leaders in these fields for sharing their experiences which was of great benefit to the participants of the conference.

Testimonials

“

Mr. Mayank Tyagi
IWAI Deputy Director
Inland Waterways Authority of India

Inland Waterways Authority of India (IWAI) participated as a co-sponsor in the Exhibition organised by Chemtech Foundation during 5th- 7th March 2020 in Mumbai. IWAI is promoting Inland Water Transport Sector. The exhibition has excellent participation from the maritime, Energy, manufacturers of various equipments/ parts and other stake holders in Oil, Gas, Power and Off Shore structures. During the Exhibition, we could interact with many Shipping and Logistic Companies, Ship Building Industry, Suppliers of maritime machinery and accessories from across the Globe.

Mr. Sanjay Joshi
Country Manager & SVP - Customer Management - APAC
Aker Solutions

The adoption of innovative technologies and collaboration for their implementation are critical to India's energy security. The Oil and Gas World Expo 2020 supported this by providing a platform for knowledge exchange through focused technical sessions and interactive panel discussions.

Mr. Kumar Swamy
Managing Director
F-intressenter India Private Limited

The Oil and Gas, Refinery & Petrochemical and Gas Tech Expo 2020 has offered so much to the participants, exhibitors and industry as whole at a time the world is struggling to breath their space. It is a overwhelming interaction and a truly motivating event to the industry. The topics are relevant, foot fall is good and over all a great networking platform for the industry.

Mr. Farrokh Bhatena
Director (Sales & Marketing)
KSB Limited

The participation in Oil & Gas World Expo and Power World Expo 2020 gave us a good platform to interact with top executives from Oil, Gas, Petrochemical and Power Industries. We were able to showcase the complete range of our "SupremeServ" products and comprehensive range of Industrial Valves and MIL Control Valves. A few innovative products which we could display, included "Mechanical Seals" and "Augmented Services" from SupremeServ.

WHAT OUR **STAKEHOLDERS** SAY

OF SERVING THE CHEMICAL
PROCESS & ALLIED INDUSTRY

250000

A uthentic connect with
professionals from chemical
process industry and allied
industry

5000

Exhaustive network of
Industry Influencers, and
Business Leaders

25

Association with
International industry
partners from more than 25
countries

15

Association with leading
industry associations to
facilitate your business
interactions
